

Boletín nº 182 de Oportunidades de Cooperación:
Tecnologías de la Información y las
Comunicaciones - Seguridad

(Nov-Diciembre 2019)

1. **Perfiles de Cooperación**
2. **Informes Tecnológicos**
3. **Próximos Eventos**

1. Listado de Perfiles (37)

	Title	Abstract	Referencia
1	LC-EEB-04-2020: Construction research institute is looking for industrial partners with expertise on smart windows or adhesive technologies	A Spanish construction research institute is seeking industrial designers and/or manufacturers of smart windows and industrial developers of construction adhesive technologies to enter into a research cooperation agreement for a H2020 project proposal on industrialisation of building envelope kits for the renovation market.	RDES20191129001
2	Spanish Technological Centre is searching a company to participate as end user in a FTI-H2020 project aimed to develop a biodegradable and compostable high barrier multilayer packaging	A Spanish Technological Center is preparing a project proposal to be submitted to Fast Track to Innovation call under Horizon 2020 programme. This Center is a non-profit organization with the mission of improving the competitiveness of the regional SMEs and companies. The project will develop an active biodegradable and compostable multilayer film for snacks packaging. The company seeks a partner, which role will be end-user. This partner will validate de new technology in a real scenario.	RDES20191210001
3	H2020 MSCA: German large company looking for researcher with expertise in collaborative robotics, autonomous vehicles, AI	The Germany-based global leader in industrial trucks, related services and supply chain solutions is looking for a PhD/experienced researcher from outside Germany to develop a joint MSCA IF Society & Enterprise Panel Research proposal for the call 2020. The joint project to be developed together shall be in one of the following fields: collaborative robotics, autonomous vehicles, AI (artificial intelligence).	RDDE20191106001
4	Ongoing EUREKA project: Encryption partner needed to establish a health data platform	An Austrian SME with expertise in AI for healthcare and international R&D expertise is part of an ongoing EUREKA project. Now they need to replace a partner. The project's aim is to automatize, interpret and standardize electronic health data to share these encrypted and anonymized health data on a protected platform to enable research and clinical studies. A company of any size is needed to handle encryption, end-to-end protection, anonymisation and pseudonymisation of the shared health data.	RDAT20191029001
5	EUROSTARS: Spanish company is looking for a partner specialized in digital video processing, artificial vision applications and data analysis for the development of an improved indoor location technology	A Spanish tech-based company is preparing a Eurostars proposal for the development of a improved indoor location technology. It is based on a mobile application that offers a catalogue of incremental services of location and guide in interiors from images and measurements of radiofrequency captured by the user's own mobile. The company is looking for a partner with expertise in video processing, artificial vision applications and data analysis.	RDES20191205001
6	Eurostars2/Eureka: Partners sought for developing cloud-based virtual tradeshow editor	A Korean SME provides business solutions for other SMEs, including IP (intellectual property) asset management and business development. The company wants to expand its portfolio of services to include a cloud-based virtual tradeshow editor using the very latest VR technology. The company is looking for partners to carry out joint R&D on virtual 3D market spaces in a project proposal to be submitted under the Eurostars2 or Eureka Programme.	RDKR20191015001

7	H2020 ICT: Industrial partner, mobile network operator or 5G Radio Access Network equipment vendor is sought to help build and experimental test-bed for next generation applications	A system integrator SME based in North Eastern Italy with sound expertise in telecommunications is looking for an industrial partner, Mobile Network Operator or 5G Radio Access Network (RAN) equipment vendor, to cooperate in the implementation of an enhanced experimentation field hosted in the company's neutral host smart infrastructures in order to build a complete and innovative experimentation facility, in the context of a proposal to be submitted under a 5G PPP call of Horizon 2020.	RDIT20191008001
8	FTI - Structural health monitoring of bridges	An Italian SME, leader in road safety, crash test, and impact test, is looking for industrial and/or reserch partners to submite a Fat Track Innovation (FTI) proposal. The project is an Internet of Things (IOT) smart diagnostic sensors integrated in a Cloud platform for Structural Health Monitoring of Bridge's network. The goal is to provide a real time bridge's monitoring, through automatic alarm sensors, installed on all potentially hazardous parts of bridges, previously identified.	RDIT20191205001
9	EUROSTARS: A German SME is seeking partners with expertise in oncology, femto-second-laser technique, and medical software development to build a prototype of a patented laser-based cell disruption technology for the anti-tumour immune therapy.	A German diagnostic SME has developed a patented laser-based cell disruption technology for the anti-tumour immune therapy. The technology allows the extraction of the intra-cellular anti-gene structure of the tumour cells, which is chemically unchanged and enables an efficient stimulation of the immune response and vaccination. A project proposal shall be drafted for the next cut-off in February 2020. At least one SME and further partners are sought for research cooperation agreements.	RDDE20191007001
10	Looking for partners for Fast Track to Innovation or collaborative projects in fire fighting	An Italian company has developed an integrated system (software solution), that is easily customizable depending on type and size of the client, for fire management and monitoring in real time, currently under development in SME instrument Phase I. The Italian company is interested in finding partners with whom to develop case studies in real time conditions through research and development agreements, by submitting proposals under Fast Track to Innovation scheme or collaborative projects.	RDIT20191114001
11	EUREKA - Intelligent Enterprise Manager software: Looking for project partner to develop financial software	The Entrepreneurship center is first the entrepreneurship center in Croatia that connects entrepreneurship with innovative technologies in socially responsible and profitable projects.Intelligent Enterprise Manager is a financial software for simple reporting, planning and analysis, software which doesn't only provide information but also helps in decision making within all levels of the company. They are looking for another SME to help them to develop prototype and test it in their country.	RDHR20191125001
12	DT-FOF-10-2020 Pilot lines for large-part high-precision manufacturing	The Institute of Laser and System Technologies of a Northern German university is coordinator of a proposal to DT-FOF-10-2020 "Pilot lines for large-part high-precision manufacturing". To complete the consortium further industrial partners are sought: 1. End users of large-scale metal or hybrid parts (shipbuilding, large machine construction) 2. Companies with expertise in work-holding devices, equipment calibration and post-processing/heat treatment.	RDDE20191126001
13	Industrial partner sought for a joint doctorate / advanced training in mechanistic electrochemical studies, call H2020-MSCA-ITN-2020.	A consortium of European universities require industrial partners to participate in a European Joint Doctorate (call H2020-MSCA-ITN-2020) in the field of electrochemistry. The cooperation will be based on the placement of highly trained PHd in industries to study the fundamentals of mechanistic electrochemistry with the aim of developing novel electrocatalytic materials and to testing them in real conditions.	RDES20191118001
14	Chinese lab engaged in network information and artificial intelligence looks for R&D partner in Finland	A Chinese lab engaged in network information and artificial intelligence is looking for a technology partner from Finland to initiate a jointly R&D project to test new technology, methods and models for IOT(Internet of Things) digital platform of next-generation intelligent transportation system with focus on V2X(Vehicle to X) to support automated vehicles.	TRCN20191011002

15	Chinese company engaged in smart transportation industry looks for technology partner in Finland	A Chinese company engaged in the smart transportation industry is looking for a technology partner from Finland that can further improve the performance of their smart transportation solutions and services through a technical cooperation agreement.	TRCN20191012001
16	A Korean company specializes in developing and manufacturing Developer Recycle System and Developer Control System is looking for suppliers for module-type pumps with filter for the systems under manufacturing agreement.	A Korean company specializes in developing and manufacturing Developer Recycle System(DRS) and Developer Control System(DCS) is looking for suppliers for module-type pumps with filters for the systems. Both the systems DRS and DCS are on high demand especially in Display markets seeking cost-cutting process and wastes treatments. Manufacturing agreement is considered, but other partnership types can also be furtherly discussed if needed.	TRKR20191022001
17	A Korean company specializes in developing and manufacturing of Developer Recycle System is looking for suppliers of UV absorption sensors for the system.	<p>A Korean company specializes in developing and manufacturing of Developer Recycle System (DRS). It is looking for suppliers of UV absorption sensors for the system under manufacturing agreement. The company expects to expand its supply chain, and below are the specifications of its current use absorption spectrometer.</p> <ul style="list-style-type: none"> - Measurement Method: Beam & Filter - Wavelength: 254-313nm - Material: SS 316 - Output: DC4-20mA, RS232C - Range: 0.005-3 Abs 	TRKR20191023001
18	A Korean Company is looking for nanofiltration (NF) technology on Developer Recycling System (DRS) that removes photoresist (PR) from used developing liquid.	A Korean manufacturer of Developer Recycling System (DRS) and Developer Control System (DCS) is looking for a partner who has nanofiltration (NF) technology under manufacturing or service agreement to improve its existing DRS. NF technology removes photoresist from used developing liquid.	TRKR20191025001
19	A Korean Company is looking for concentration control technology on Developer Recycle System (DRS) to measure the concentrations of Tetramethylammonium hydroxide (TMAH), Carbonate (CO3) and Photoresist (PR) in real time	A Korean manufacturer of Developer Recycling System (DRS) and Developer Control System (DCS) is looking for a partner who has concentration control technology under manufacturing or service agreement to improve its existing DRS. Concentration control system measures the three concentrations of Tetramethylammonium hydroxide (TMAH), Carbonate (CO3) and Photoresist (PR) in real-time which is formed after photoresist (PR) is dissolved by TMAH.	TRKR20191025002
20	Austrian medical device manufacturer is looking for materials / methods / automated process for bonding of plastic parts	An Austrian company active in the diagnostic healthcare business wants to reduce production time of their products. This should be done by improving the bonding step of the plastic housing parts. They are looking for alternatives to currently used silicone, new methods and/or an automated process. Partners from industry or academia are sought under commercial agreement with technical assistance, license agreement, technical cooperation or research cooperation.	TRAT20191018001
21	Development of new information transaction portal needed for international sports business service providers	A UK-based small but growing company, active in the provision of international business services in the area of global major sporting events, seeks support to develop and launch a revolutionary information transaction portal for such major events that will provide the Olympic and World Cup event organisers with the first-ever single interface to global suppliers, enabling the company and its supply partners to grow. A technical cooperation agreement is sought.	TRUK20191003001
22	Cost effective equipment for lifting and transport of low weight modules (<250 kg) in offshore wind farms	A Dutch company is looking for the joint development of new concepts for equipment lifting and transport in offshore wind farms in order to optimize safety, be more weather independable and save costs. The company is looking for a collaboration with research and engineering partners and envisions a research or technical cooperation agreement. This technology request is part of an open innovation challenge.	TRNL20191010002

23	Latvian horticulture vocational high school is looking for technologies for diagnostics of plant diseases by hyperspectral imaging	A horticulture vocational high school from Latvia is developing an autonomous robotic platform prototype with integrated modules of cameras and sensors, equipment and software for plant growth monitoring. The high school is looking for partners with know-how in detection and diagnosis of plant diseases by using hyperspectral cameras. The school is interested to enter into technical cooperation agreement.	TRLV20191022001
24	Looking for producers of drones, including sensors and software, for inspections of marine structures	A Swedish company in marine infrastructure solutions wants to use remote operated drones to render models to analyse marine structure, detect failures and damages and contribute to life cycle maintenance. The company is looking for producers of airborne and seaborne drones for inspections as well a sensors and software for inspections with drones. Cooperation would be within a manufacturing, licence or joint venture agreement. This request refers to an open innovation challenge.	TRSE20191024001
25	A Spanish company developing an industrial innovative material is looking for providers of cellulose moulding industrial equipment	A Spanish company is developing technologies to transform vegetable waste into biodegradable industrial materials that may outpace plastic in some applications. They are looking for companies that can provide them with cellulose moulding machinery and/or related technologies, which are relevant to their process, as they would like to build a low production, demonstrative plant. The company offers commercial agency agreements and joint venture agreements to potential providers.	TRES20191111001
26	A leading Dutch mobility consultant is looking for innovative ways to gather travelers experience on neighborhood or street level, and to combine this with objective traffic and transport quantities	The Dutch corporate delivers advice, services and software products related to mobility to a network of traffic engineers, policy officers and road authorities. They want to use traveler experience to improve the performance of the mobility system . They are searching for ideas, methods and techniques to create a so called 'experience monitor mobility'. The cooperation would be in the frame of a technical cooperation agreement. This technology request is part of an open innovation challenge.	TRNL20191016001
27	Italian SME leader in the x-ray and ultrasounds technology sector is looking for partners with know-how in the field of artificial intelligence aimed to detect in automatic mode defects in mechanical parts under a technology cooperation agreement	Italian company founded in 1947 has developed a solid experience and competence in x-ray and ultrasound technology with applications in the medical, industrial and security market. It is looking for a partner in the field of x-ray image post-processing, with a strong know-how in artificial intelligence development aimed to detect in automatic mode various types of defects (e.g. porosity, cracks) in mechanical parts (e.g. aluminium casts, iron casts) under a technology cooperation agreement	TRIT20191121001
28	German enterprise seeks partner from the machine tool industry (e.g. robotics) to co-develop machinery for automated disassembly and sorting in the recycling process	A German company and a research organization aim to develop an automatized pre-shredder recycling process for the automotive or machinery industry in order to secure nearly 100% closed loop recycling in particular with respect to rare and valuable materials. The process requires data driven automatized dismantling and sorting machinery. The consortium is looking for a manufacturer of machinery or an institute as research partner providing the technology of dismantling and sorting machinery.	TRDE20191001001
29	Cost effective broad band internet in wider coastal areas	Dutch leading global dredging and offshore contractor and maritime services provider is looking for partners to jointly develop new communication concepts to improve data throughput overseas for lower costs. The cooperation would be in the frame of a research or a technical cooperation agreement. This request refers to an innovation challenge published on an open platform.	TRNL20191015001
30	Looking for innovative energy efficient and environmentally friendly ways to dispense cold beers to consumers	A Dutch beer brewer is looking for new ways to reduce the energy consumption of its global fleet of fridges (and subsequently its carbon footprint). They are looking for experience in product design, business process modelling, creative thinking, software development, consumer intelligence and customer experience to develop new solutions within the frame of a technical cooperation agreement. This request refers to an innovation challenge published on an open platform.	TRNL20191023001

31	Dutch designer and consultant in built environment is looking for partners in low temperature heat networks to accelerate energy transition	The Dutch multinational specializes in built environment and sees a large role for low temperature heat networks in the energy transition. Therefore they are looking for partners to realize a pilot with cooperation partners and municipalities with the opportunity for setting a standard in a test environment. A technical or research cooperation agreement is proposed to form a consortium to develop technical concepts. This request refers to an open innovation platform.	TRNL20191024001
32	Dutch operator of offshore floating platforms is looking for ways to convert wind power into hydrogen and further into a liquid that can safely be transported to the shore	A Dutch company specialized in floating platforms for oil and gas production is investigating concepts to produce liquid synthetic fuels from hydrogen made of wind energy on vessels enabling safe transport of energy generated in remote areas at sea where power cables are not feasible. A technical or research cooperation agreement is proposed to develop the technical concept and a service agreement to evaluate the business case. This request refers to an innovation challenge on an open platform.	TRNL20191023002
33	A UK based company looking for partners to assist in the development of several projects in the Fintech, marketing and defense sectors via a joint venture agreement or License agreement	A UK based company is looking for partners to assist in the development of several projects in the fintech, marketing and defense sectors. The company is interested in software development and IT consultancies in the finance/banking sectors or companies / research organisations in other sectors that can help develop and implement cloud-based architectures, through a joint venture agreement or license agreement.	TRUK20191004001
34	Smart autopilot technology for vessels sought by leading Dutch maritime company	A leading Dutch maritime solutions provider wants to deliver a smart autopilot enabling the navigator to supervise instead of execute navigation. It is looking for technology to integrate surrounding sensor data combining this with route data and sea traffic rules. Partners can be companies and research organizations. Aim: to implement a minimum viable product as launching customer, within the framework of a technical cooperation agreement. This request refers to an open innovation challenge.	TRNL20191017001
35	German start-up seeks technical, design and consultancy expertise to build own test bench for hydraulic components/systems under manufacturing agreement	A young, ambitious and award-winning start-up company from Germany with the vision to build intelligent equipment for water networks is looking for partners with technical expertise and know how on building test benches for hydraulic equipment. The company seeks design, consultancy and technical advisory services and expertise to build own test bench under a manufacturing agreement.	TRDE20190916001
36	Technical solutions for carbon capture and utilization	An international group of companies with headquarters in Northern Germany is providing industrial solutions to customers in oil and gas sector in Asia and Middle East. Sought are contacts to SMEs or research partners with technical solutions to convert carbon dioxide to a useful commodity. Solutions should minimum have been tested at lab scale, closer to market is preferred. Cooperation is offered in form of technical cooperation agreements or commercial agreements with technical assistance.	TRDE20191028002
37	Brussels based SME that developed a modular, low carbon, autonomous tiny housing box is looking for partners that can provide sustainable technologies to improve the energy management systems used in the housing boxes	A Brussels SME has developed a light weight, autonomous type of housing with low environmental impact. The container style mobile housing unit is autonomous in terms of water and energy use and built with sustainable construction and zero emission technologies. The SME looks for partners to improve the technologies (e.g. sustainable batteries, PV and water purification system, home automation) applied in the housing box. The company is looking for technical and commercial cooperation agreements.	TRBE20191009001
